Stop this, why are we destroying our selves. I'm 13 and I don't wanna grow up where the earth is literally burning up. I want my kids and grandkids in the future to have a normal life without this constant greed for ai and data centers.

Why are we doing this now. When the global warming is at its peek and will soon be irreversible. It's now we should care and decrease global warming. And why is it that maybe 20 years from now we kids will have to clean up from all the billionaires and adults that are making stupid decisions. I'm young but i still know the disasters that will happen in the future.

New Mexico Environment Department should give the public an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
