

## Lisa Wiener

I am a 15-year-old girl from Austria and I didn't agree to spent my life correcting the previous generations failures in climate change, arctic melting, corrupt industries, mass extinctions, nature destroying projects, capitalist rulers and so on. Yet I still set my name on every single petition I can get my hands on to stop the world and the humans from evolving into a wrong direction. I do that to prevent nature and humankind from dying and hope that, one day, this goal isn't that out of reach as it is right now.
