I am 15 years old and i have a dream to grow up. I want to grow up and have a peaceful life, not a life where i have to fight for the air and water from the world i was born on. I want 2 kids, a husband, and a tiny dog. I want to be able to make them the type of breakfast u see in movies. Ladybug tomatoes, smiling bacon, and sunflower eggs. I want to be able to do this without worrying how i'll be able to grow the tomatoes without water. How i will be able to find bacon with no pigs. How i will to find eggs without chickens. We do not need AI. We need our world.
