

Sabrina Verdoza Rivera

We do not want this data center in our desert. One person affected by poor air quality and noise pollution is one person too many. There are several schools very close to Project Jupiter along with many families that live nearby and they deserve to live a life free of pollutants. They deserve access to clean air and water. Project Jupiter you have got to go!!!!!!!!!!!!!!

I also do not appreciate the lack of transparency and tactics being used by Oracle. The misinformation and lack of the full story is appalling. Get out of our home!
