

Clifton White

We do not want more ai!! Let alone a massive data center that will only exacerbate the problems we are already facing in NM. Ai is both ethically and economically dubious there is no reason for us to suffer for something that will never benefit us. Stop Project Jupiter.

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
