We don't need data centers anymore!! How much more land is being taken over by big corporations that make false promises to the community! Our planet is going through an insane drought. This doesn't benefit the community; it only benefits big corporations at the cost of the community.

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
