I am a citizen of this country and I would like to lower the amount of suffering everyone living here has to endure, the construction of this plant will only bring more problems that everyone will have to deal with. It will cause more harm than good, the pollution will kill people, no matter what the plant cannot be constructed, if you have a heart id encourage you to think about the people. The people whose blood will be on your hands if the plant is constructed, there's already enough evidence to support the harm it'll do. Make the right choice.
