

Elvira Esparza Bencomo

As a resident of Dona Ana county I STRONG OPPOSE Project Jupiter. The are more negative effects to community, people, and environment if this project was to be able to move forward.

We are in a severe drought and a data center that big will make the situation worse. The developers will hide the true number just to be able to get the center built. Looking at otjer areas that have had centers built around them there is nothing but problem.

Do not approve. They are not wanted or welcomed
