

Riley Leger

The greed and hatred for others that one must have to want this to be built is astounding. What will you do when there are no more people to use this tech and fill your pockets?? What will you do when there is no more ocean to exploit? What will you do when there is no more oil in the ground to take?? You and everyone like you will end up poor and powerless. You have time. You have time to change and not only help all of us, but also help yourself. Rethink this decision. We do not need ai, generative ai is all that trickles down from the rich and i'm not interested in my planet dying because you people want to lick the boots of people who don't care. Take 60 days to review this and deny that air quality permit. If not a public hearing should be held in Santa Teresa. This permit being approved is government sponsored environmental racism, these people deal with enough and you want to put more on their plate to put more money in your pocket?? Money you don't even know how to spend?
