

Melanie Velez

I find it absolutely ridiculous that so many ai centers are being built when there is no public demand for ai usage but rather companies forcing ai features down users throats. We were fine before ai was revolutionized and we will still be fine without it. These useless centers are destroying our environment: rivers and lakes are running dry, people complain about headaches and noise, ecosystems are being killed off due to the natural disasters stimulated by this absurd amount of water usage. Stop with ai. Stop killing our earth. Stop building the center.

"The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."
