

Anna Jusge

I am someone who is concerned about residents safety in a local capacity as well as a larger human community and general public well being. Seeing this plan the public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. An air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste and if the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution. Not to mention this would be a huge contributor to further pollution and worsening of public health.

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
