I am a New Mexican born and raised, I love our state with every fiber of my being. That is why I'm so heart broken about project Jupiter's construction in our state, despite what they say about new job growth and benefits for our community, the facts of this project show negative affects that significant out way any benefits. The projected environmental hazards will have lasting effects on every aspect of life in our state. Our air quality is already below national standards, can we really sacrifice to add to that pollution! So please help keep this land enchanted, and keep data centers out of it!

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.

Sincerely, a concerned citizen.
