

Israel Pleasant

Billionaire profits at the risk of resources and land that are already deprived is corrupt. The habitat destruction in New Mexico is already too much with urban construction taking over especially in rural areas like Rio Rancho and then too add a useless data center is actually evil. Why build houses for people to live here if we won't be able to breathe or drink. New Mexico has precious wildlife and flora, why destroy that for the most useless thing in this world. AI is garbage.
