

## Mads M

I have a degree in Computer Science, and I'm conducting ongoing research with a thesis focused on utilizing AI/ML for computational biology purposes. Even so, I strongly oppose any permits that will be used to help build data centers in the state of New Mexico. It cannot be understated the devastating consequences on the environment and the citizens of our state this will have. These companies do not care about us nor do they care if they exploit our land. I say this as an academic: allowing Project Jupiter to further invade New Mexico will be a disaster for us all no matter if you believe you have the money as an individual to escape the fallout.
