

Benjamin Ramos

As a resident of Albuquerque I am asking you to deny any and all permits associated with Project Jupiter or any other data center proposed. These projects are extremely harmful and will bring no benefits to the community while driving up residents energy costs, polluting our air with millions of tons of CO2 and toxic emissions and wasting our already limited water. We are already seeing unprecedented heatwaves due to greenhouse gasses and the last thing we should allow is a project as wasteful and polluting as this. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
