

Paul Escamilla

As a STACK employee, I am writing to express my support for Project Jupiter.

As we work to bring this innovative data center campus to Dona Ana County, I am proud of the responsible development approach guiding our efforts. Project Jupiter is expected to create thousands of construction jobs, support ongoing employment, and deliver significant investments in local services, schools, and water infrastructure. Just as important, the project reflects a commitment to building for the long term in a way that respects the surrounding community.

I strongly encourage the New Mexico Environment Department to approve Project Jupiter.

Sincerely,
Paul Escamilla
