

Elvira Esparza Bencomo

I am against Project Jupiter. The negative impact to the community are too great to over look. The amount of water, enery, and emissions from such a large facility will damage NM even more. Why would a company build in the desert if they need water that the state doesn't. The air quality will be greatly reduced because they are going to be using an untested, unproven method after their original plan was protested against. Keep NM beautiful. Keep the air breathable. NO TO PROJECT JUPITER

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
