

Christopher Aguirre

As a lifelong resident of Donna And Count, I urge you to listen to the many (real) voices of concerned New Mexicans that oppose Project Jupiter. This project has been deceptive from the start, and the companies behind it do not care what is best for New Mexico. Please do not allow these giant corporations to take our resources and do irreparable harm to our local environment. Please do what is best for the future of New Mexico, and deny Yucca Growth Infrastructure's application for an air quality construction permit.
