

Amy Haselwood

This project brings absolutely no benefits to our community and will not only pollute our environment but the current plan is completely unproven and will create huge amounts of dangerous waste. We must protect our air and water quality. These are things that we cannot get back. As a member of this community and someone who wants to live and grow a family in New Mexico, it's important to me that we put the needs to the community and health of the environment before a corporation's desire to make money. Please deny this project.
