The facts we do know about this proposed plant point to a totally unacceptable level of pollution. The environment cannot sustain this. That is a fact. People who have been subjected to these data centers elsewhere have said the only local jobs created are the construction. These corporations will find a way not to pay any taxes or invest in the community. Look at their actual history. The Ai is not for us. It's to power software for big corporations to sell datamining. Ask why they aren't building in their communities. Or why more affluent communities are saying no. We don't have to be human guinea pigs.
