

John Lee

I am writing to express my objection to Project Jupiter, which I believe is a terrible idea.

Project Jupiter is poised to destroy Doña Ana County. It is anticipated to use more water per year than all of Albuquerque. Are you people crazy? Never let this happen, in any community anywhere. It is bad for the environment, and will be another abuse of all your data privacy. Just like flock cameras are destroying your privacy. Just say no to this insanity.

I urge the New Mexico Environment Department to not approve such a terrible project.

Sincerely, John Lee
