

Diane Martin

This AI data center nightmare will reduce available water in a hyper drought prone area. It will use up electrical resources to have the existing residents pay more for basics like power and water. Please consider relocating this project to the site of the closed Four Corners Generating Station. It already has the electrical infrastructure and can use solar/battery + wind there. Likewise morgan lake was a prior water source.

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste.

If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.

Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution.

Thank you.
