

Erica Vasquez

I am NOT IN FAVOR of Project Jupiter. Dona Ana County needs to address the water issues in are area 100% before moving onto another project that will impact water usage in the area.

The Dona Ana County Commission, with exception of Susana Chaparro, have ignored the pleas of the community to correct potable water issues in the area.

The County Commission made an emotional not logical vote to approve the project. The dollars the project will supposedly bring to the area impaired the logical judgement of the Commission by driving their fear of losing revenue for the area if they did not pass the resolution with in the time frame the Management of the project dictated.

The DA county commission has failed the community.

Sincerely,
Erica Vasquez
