

John Rawlings

Please deny this application... it is clearly a threat to our environment and our way of life. Our people deserve to live in a place where they won't become sick from the bad air and water that the data center and the microgrids will bring. The people who live here deserve better transparency from the people in charge about these companies and their relationships to them.

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
