

Elizabeth Small

I am a resident of Albuquerque and I passionately ask that you deny Yucca Growth Infrastructure's air quality permit. The process has not been fair nor just, and public is entitled to more time and equitable information sharing.

It is clear that the public interest and wellbeing is of no concern to Yucca Growth Infrastructure, as Project Jupiter has been illegally changing names of opposing signers to supporters. Additionally, the environmental impacts will be felt for generations of New Mexico families already living in counties drained of resources or experiencing radiation or pollutant contamination.

There is much support needed in this state, but giving money, land, and bodies to the environmental destruction of AI and large scale data centers will only bring more poverty and death. Approving this permit would be environmental racism, with undeniable ramifications for the incredible people of this state. Please consider us, your constituents, first.
