

Liz Speckledrock

Good Afternoon,

I am writing to express my OPPOSITION to Project Jupiter. Once again the many will suffer for the benefit of the few. This Data Center will produce more greenhouse gasses than the largest cities in the state and consume massive amount of fresh water. All the jobs that are promised from this project are temporary, but the damage will last for generations.

I am urging you to please reconsider the construction of this AI data center in southern New Mexico.
