

Dolores Lara

To Whom It May Concern,

Project Jupiter would be deeply destructive to our New Mexican communities and environment.

The proposed location for Project Jupiter is in a community that has been fighting for clean drinking water. The project would pollute the air and skies of Southern New Mexico for generations.

I am tired of the ads and propaganda being put out by Project Jupiter that overstate the amount of jobs that will be created and don't give accurate information about the pollutants that will flow into our communities.

As a retired teacher, I know how important healthy starts are to children and young people in our communities. Our families need clean environments to thrive.

Please deny the air quality permits for Yucca Growth Infrastructure, LLC.
