

Gillian Taylor

Do not allow project Jupiter to go forward. We cannot endanger the air quality, water quality, and ecosystem of southern New Mexico for a data center that we don't need. This project is not sustainable and not popular. I am a resident of Tijeras NM and my family and I have lived here for decades. Throughout my life, I have seen changes in my back yard related to climate change, and the amount of greenhouse gas emissions and pollutants expelled by project Jupiter will no doubt exacerbate these changes everywhere. Doña Ana county already experiences decreased air quality compared to the rest of the State, and its residents are already disproportionately impacted by pollution. Additionally, Bloom Energy has a history of illegally dumping hazardous waste. Please deny this air quality permit, for the safety and health of the residents of Doña Ana and the rest of New Mexico and the neighboring states.

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste.

If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.

Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution.
