

Lou Kay

The world will not be a better place if we have more AI. Southern NM will not be a better place if we have Project Jupiter. Even if it could do all the good things they claim it will hurt the environment and will reduce the number of jobs with the AI. Please protect our world, our environment, and our culture. Do not allow Project Jupiter to exist. It will use a tremendous amount of energy if it is allowed to be built. This will cause the release of at least much CO₂, leading to even more global warming. Our part of the world will suffer and many of the other parts of the world will suffer more.
