AI is destroying our world. it makes us dumber. we as people, as students, as workers, as children and adults alike, are losing access to real information that will educate us. Building an AI data center will pollute our air and water even further. it will poison our people. it will poison our wildlife. it will destroy our land, our environment, and our freedom. it further risks the culture we are already losing. as someone who will soon grow into adulthood, AI is already impeding on my development. i don't need it to destroy my home too. as citizens of this beautiful state, with aspirations, dreams, our own will and our own voice, we need to speak up. we need to stop this. STOP PROJECT JUPITER!!!
