

Raul Daood

I am a resident of New Mexico and have been all my life. I am asking that you do everything you can to stop project Jupiter. This is not for the people in any way. It doesn't take much effort to see that this is for the tech monopolies to deepen their pockets and grow their power. They have already broken laws in New Mexico and it's the state government's job to protect these lands and people. First allow an additional 60 days to review and comment on the air quality permit so the communities this is actually going to impact can participate equitably. This should not be the choice of politicians who would likely be receiving financial compensation to pass this permit. The Air quality permit should be denied as bloom energy has already been shown to be illegally dumping hazardous waste in other circumstances. We are the land and it is our duty to protect it, because that interest of the land is our own self interest. If we allow them to poison the land, we are poisoning ourselves and the future generations. If this permit is not denied, a hearing must be held in Santa Teresa, in both English and Spanish, with the option for virtual attendance. We must have this trial accessible to the public so these decisions are not made behind closed doors by people who prioritize their personal gains over the health and care of our communities. Residents of Doña Ana County are already disproportionately impacted by environmental pollution and to allow project Jupiter to continue is government funded racism and corruption. The air quality already doesn't meet federal requirements and regulations. Please, if you love this land and its people and hope to save our Mother Earth and ourselves. It starts here with you. Do not sell out our futures and families for the gain of private equity firms and tech giants who do not value our deepest commitment towards this beautiful delicate home we call Earth. She has provided for us and now we must protect her.
