

## Michael Patten

I'm genuinely impressed with how little water this data center is going to utilize. I did a lot of installs for the Union at the Facebook data center in Los lunas New Mexico they projected up to 850 households worth of potable water annually. This project projects 400 times less than the local data centers. I support you setting the golden standard!

I am writing to express my support for Project Jupiter, which I believe offers significant benefits for our community.

Project Jupiter is poised to bring substantial economic growth to Dona Ana County. It is anticipated to create 4,000 construction jobs and 1,500 project-supported jobs. Furthermore, Project Jupiter has committed \$50 million to help repair, upgrade, and improve local water systems; \$360 million in direct support for schools, infrastructure, and local services; and \$6.9 million to fund workforce development initiatives along with supporting the Boys and Girls Club of Las Cruces, clean drinking water, the local community college, and habitat restoration.

I urge the New Mexico Environment Department to approve this important project.

Sincerely,  
Michael Patten
