We don't need AI data centers!!!! we need water in our river. we need greener trees not more housing. New Mexico was 100x more beautiful when millionaires didn't know about us!!! We love our old town, old fashioned roads & traditions. Leave our water & vegetation alone already. No one is in favor of AI anything life is better & healthier without all of BS. I've swam in the Rio Grande River all of my childhood, it's never been dry & it's never been this hot before. You millionaire companies should go back to california or Washington & ruin ur own state not ours!
