

# Cynthia Brown

I am opposed to the air quality permit for Project Jupiter being passed.

This permit is due to be issued before a public comment meeting scheduled for 8/11/2026.

The ramifications of this project on the people and environment of Dona Ana County is being kept secret, with plans for energy and water usage continually changing.

How many New Mexicans will Project Jupiter commit to hiring, and at what salary?

With evidence of wrong doing at this stage, changing public comments and false advertising, these companies can not be trusted to do the right thing for our community.

I vote NO.
