Members of the Board,

As the largest, privately-owned transportation fleet in the southwestern United States, I'm writing to express my strong support for Project Jupiter, which I believe offers significant benefits to Doña Ana County and southern New Mexico.

Our headquarters is based in Doña Ana County, and Project Jupiter promises a significant economic boost creating 4,000 good-paying construction jobs with 1,500 project-supported positions after completion. This will increase local spending across the community and support small businesses across the area. Project Jupiter's commitment to investing millions in Doña Ana County's schools, infrastructure, and local services will also help businesses attract and retain talent while strengthening our local economy and customer base.

Furthermore, Project Jupiter has committed \$50 million to help repair, upgrade, and improve local water systems; \$360 million in direct support for schools, infrastructure, and local services; and \$6.9 million to fund workforce development initiatives along with supporting the Boys and Girls Club of Las Cruces, clean drinking water, the local community college, and habitat restoration. Additionally, Project Jupiter's heard the community's concerns and has decided to use a new energy strategy to reduce regulated emissions and water usage.

All these benefits combined contribute to a strong and vibrant community.

I urge the New Mexico Environment Department to approve this important project which can help build a more economically diverse and vibrant community.

Thank you for your consideration.
