Hello, I am writing this as a person who is struggling with the effects of the climate change and wants to actually do something to change this because I still believe humanity can make a change this situation. The Government should deny this air permit as soon as possible. It's not only affecting the people around it and the surroundings next to the area but our planet. Even right now we are struggling with extreme heat because of the climate change. If this project comes to life it will release up to 10 million tons of climate warning greenhouse gasses every year. This means that the CO2 pollution alone will heat our atmosphere at a much faster pace. Can you imagine trying to survive in a much worse heat while we already have people dying because of the current heat. This project would erase most of the climate progress we have made in the last two decades. When we run out of time even money can't bring back the beautiful planet we had. Another problem then the greenhouse gases are the water amount they use to cool down their data centers. When we have ai like ChatGPT already using 39 millions of gallons of water every single day. And a bigger project like this would use even more gallons of water leaving us with no more drinkable or useable water. Oh and let's not forget the animals that are about to go extinct. What do you think will happen to animals if we ruin their homes. Is the project happens just like how we would not survive also the animals would not survive. Its because we are ruining beautiful species life's with our own hands. And we know that if we don't have them the ecosystem would collapse but since people think money is much more important then this they still try projects like these. As I said in the beginning I am writing this because I still believe we can change and take action immediately. Small changes are not always small. The impact can be big. Like this we can save our future from those who don't care. I still believe in humanity that we can change stuff. Let's get together and stop this awful project for the environment. For a better future with the animals and our loved ones we should stop these kind of projects especially project Jupiter immediately.
