

Ben Nava

Having a new data Center doesn't help our current state. The more we use the more water we don't have, and what about the local wildlife that are driven out of their homes all because of these selfish people that "can't live without AI". Our communities are dying, our planet is dying, and we won't survive all because of AI and its users. Don't build this data Center and stop using AI. We only have a few years left until all of it is irreversible and everyone, and everything will plummet to extinction.

New Mexico Environment Department should give the public an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
