

Robert Keatts

Hello my name is Robert Keatts, I am commenting to show that I am against project Jupiter and I have a very strong distaste towards it. Here is why, Project Jupiter actively endangers the people not to mention the animals. This data center is being built only 5 miles away from 2 schools. The gases and smoke the data center would emit would directly put hundreds of children in danger. Project Jupiter is also actively dumping their waste into the Chihuahuan Desert. Santa Teresa is not a place for dumping waste. It is a community. Project Jupiter has failed to properly warn and inform the tribal governments around where they are building this massive data center. The data center will emit hundreds of thousands of tons of greenhouses gases and toxic waste every year, it will drain our waters supplies. The company behind Project Jupiter has a history of dumping illegal hazardous waste. This is not what is good for our communities, for our people, for our animals, or for our world. I am Robert Keatts, Stop Project Jupiter.
