

Courtney Gerbhals

Project Jupiter will hurt the environment to the extent of it being nearly incapable of being repaired. If we want to live our lives on earth, we'd treat it right. The result of Project Jupiter is harmful to not only the climate, but harmful to the land where the project will take place. There is a high school not even six miles away from it. The fuels from the power plant are going to be toxic. If you aren't going to make up for the harm caused by this experiment, then you shouldn't do it at all.

"The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."
