

Marley Patcher

We cannot risk the condition of earth to be anything but flourishing. Nothing less. Stop building this data center. The cons outweigh the pros. On top of that, the public should get an additional 60 days to review and comment on the air quality permit so everyone can participate. The air quality is also a huge concern. The hazardous waste they dump? It's terrible. The air quality application should be denied, and if it isn't, a public meeting needs to be held at Santa Teresa. Enough is enough. The people say no!!
