

## Tasia Smithgee

The trust and accountability really comes into question when a private subsidy wants to build a data center here. The initial water usage plan was excessive and now that they received public backlash, they say it won't take that much water and have come up with a recycling plan. I don't really have faith in that since that wasn't the initial plan in the first place. Who can say that won't change in the future?

Sincerely,  
Tasia
