project jupiter is stupid and shouldn't be allowed to continue. as of the current moment, our earth is already struggling with climate change. even in europe it has made a presence. the use of ai is also limiting out clean drinking water by tons, DAILY. our clean water is at risk, water streams are at risk, antarctica and the polar bears are at risk. the more this continues, the more we and the earth we NEED TO LIVE is at risk. speak up for the earth, water, and animals we humans are putting at risk by the use of ai, data centers, and many many more. The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution. we, the earth, and animals will be harmed by this project as it gives off MANY unsafe chemicals, one even cancer causing.
