

# Micaela Lara Cadena

I will say again:

Please—

Our breath, our lives, our futures are in your hands.

I know that each of you came to state government / NMED to do right, by all our families, communities and New Mexico. I know you are brilliant scientists, attorneys, and climate leaders.

We trust that you will move with ethics and integrity. We believe that you will meet this moment with clarity and courage. We will back you up, we got you.

Please.

The people of New Mexico deserve better, much better than the dishonesty and deception of Project Jupiter.
