

Julie Shuler-Misra

This plan is such a catastrophically bad idea that I can't believe we've even gotten this far with it. We don't have the water, we can't afford the CO2 emissions. Who's going to benefit, because it surely won't be the people of New Mexico today or in the future. Say no to this terrible plan that is mortgaging our future for the benefit of some rich people.
