This is absolutely horrible for the earth! We need to be thinking about all life on the planet, not just ourselves. The world is changing so quickly and this is feeding those changes. We can live without this. We should be helping the earth and other life instead of continuing to destroy it. Do better!!

New Mexico Environment Department should give the public an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
