

Roberta Ortega

I am writing to express my opposition to the proposed Project Jupiter data center. I believe this project raises significant concerns that deserve careful consideration before any approvals are granted. First, the project's expected water consumption could place additional stress on local water resources. Second, the data center's energy requirements are likely to be substantial. Additionally, the public deserves complete transparency regarding the project's environmental impacts, projected utility usage, emergency backup systems, and any public incentives or tax abatements associated with the development.

Thank you for considering my comments and for protecting the interests of our communities.
