I've lived in New Mexico all my life and I drive past the Rio Grande almost every day for work. I'm sure almost everyone that lives here can agree they've never seen it that bad in all their time living here. The project is dangerous and the permit should already be denied given Bloom Energy's history of illegal dumping of hazardous waste. If not denied a public hearing needs to be held in Santa Teresa in both Spanish and English and any other accessibility needs. This project is going to produce more air pollution than the environment can handle. Deny the permit. Protect our planet.
