

Thomas Muniz

I'm writing a second comment on this. Website to make sure that my message wasn't changed. Or that there was something added once I left the tablet and that person using it. I am in no support of you guys being in Santa Teresa. I don't want data centers in New Mexico. You guys use up way too much resources. You guys create way too much heat and you guys make way too much noise, and we need less data centers and tracking centers. Please look for another place. I am not in support of the Jupiter project. And I am sending a second email just to make sure
My information hasn't been reused or changed. You guys do not have permission to use my email or any information about me. Just my response to you guys being in southern new mexico. Please get out
