

Alex Stephenson

We do not need AI. We need our air and water! I don't see how anyone could think this is worth our environment and where we grow as humans. We do not need Project Jupiter or any other AI data centers. All it does is pollute our air, waste our water and tear down our environment. We don't deserve this, our animals don't deserve this and Earth, especially, does not deserve this. Where is the compassion and humanity? What about the future? This will cause IRREPARABLE damage. I am not okay with this and no one else should be. The people should have a choice in whether or not this permit gets approved or denied. This is not right and should be illegal.
