I'd like to request to take down project Jupiter. It will only harm the environment and the people near it. The public should be given 60 days to review the air quality permit, it should be denied as there's cases in bloom energy's history of dumping hazardous waste. Accepting this permit is also extremely offensive and will be labeled as government-sponsored environmental racism. The residents of Doña Ana County are already impacted by the environmental pollution and it affects their daily lives. For years they have been called a "nonattainment zone" meaning that their air quality is not met by federal government rules. If the permit isn't denied, it should at least be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Please consider the project and its affects on the people who live there, along with the animals. And how it impacts the climate as well. Thank you.
